New York, NY 10022

Dear Sir:

Could you please send me information and application forms in order that I might apply for a research grant from the Council for Tobacco Research? My application proposal will deal with the basic biochemistry and molecular biology of plant superoxide dismutases. These proteins serve as an important defense against oxygen radical toxicity. Therefore these studies might be of potential interest to the Tobacco Research Council.

Thank you for your help.

Sincerely,

Marvin L. Salin
Professor of Biochemistry
